

Environmental Policy Statement

Objectives

Gas Tech Heating Services (Banbury) Limited is committed to recognising, reducing and preventing the environmental impacts directly under its control both locally and globally to the absolute minimum as is reasonably practicable.

Progress towards achieving the above objectives shall be realised through:

[a] continued recognition, evaluation and monitoring of environmental aspects and impacts such that feasible objectives and targets for reduction in impact can be formulated leading to *protection of the environment*, prevention or reduction in pollution.

[b] recognition of legal obligations of the company and the implementation of plans and arrangements to ensure compliance with statutory limits as a minimum.

[c] the implementation of a documented management system, fully integrated with existing management systems complying with the requirements of EN ISO 14001.

[d] continued review and monitoring of environmental indicators through frequent management and workforce interaction to ensure effective operation of the implemented management system and continued improvement of environmental performance.

Implementation

Implementation of the policy shall be through communication to, and the involvement and training of, the workforce in the aims, rationale and objectives of environmental management.

As an initial commitment to communication, this policy statement shall be displayed in relevant areas such that workforce and public have access to it.
